

Sustainable Homes Index For Tomorrow 2009/10

Not yet a member?

In 2009/10 SHIFT is offering two services to assist you; a learning year and an assessment.

The learning year

In 2009/10 a year of learning is planned. The year of learning will include:

- a series of workshops, aimed at specific topics highlighted by the 2008/09 assessment
- presentations and discussions with national experts in the fields of climate change adaption, mitigation and engendering change
- learning from the best practice case studies of other members
- the platform to contribute to SHIFT

In 2010/11 the second public ranking will be held. Being a part of the learning year will assist your organisation to prepare for this assessment

SHIFT assessment

An assessment will help gauge your organisation's position on environmental sustainability. In 2009/10 new members can receive a private assessment. Your performance will not be publicly ranked.

The assessment will identify your current performance and prepare you for the 2010/11 public assessment. On taking up a private assessment you will gain:

- associative membership of SHIFT
- a feedback report on current performance highlighting your environmental strengths
- recommendations on how to improve
- scores in each respective area
- preparation for the public ranking in 2010/11

How to get involved

SHIFT is growing rapidly. Come and be part of the change. Join us for a year of learning, or an assessment, or both.
